

Our EHS, Quality and Product Safety Policy

EVIOSYS is committed to provide the structure to continuously improve both the management system and our performance in order:

EHS

- To ensure the health, safety and welfare, through prevention of injuries and ill-health, of all EVIOSYS employees and others affected by our activities and the context of our organisation. To identify hazards, assess risks and opportunities and to implement risk control, and whenever necessary execute corrective action programmes.
- To ensure the protection of the environment, from design until final use/disposal of the end product and wherever our plants operate or our products are used by minimising waste, preventing pollution, and optimising our use of raw materials, energy and water.
- To actively participate in our Sustainability programme to reach the objectives of the PARIS Agreement.

Quality

- To deliver high quality products and services that meet customer requirements.

Product Safety

- To deliver products safe for use in the supply chain and for the final consumers.
- To control packaging integrity and continuously reduce potential risk of contamination through the use of hazard analysis and risk assessment programmes.

Moreover, in addition to all above specific items, EVIOSYS is also committed:

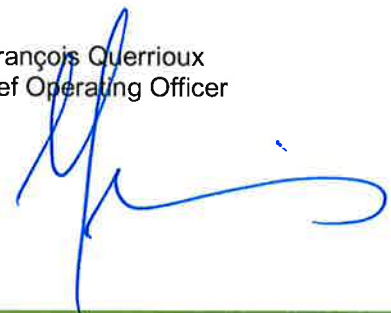

- To comply with all applicable legislation, Divisional directives, standards and other requirements.
- To provide appropriate and adequate resources, information, instruction, training and supervision, to all EVIOSYS employees.
- To ensure that all EVIOSYS employees and others working on our behalf understand their obligations and responsibilities within the framework of our management system.
- To investigate and correct all non-conformities with the aim of preventing reoccurrence.
- To consult and communicate with employees and where applicable with other interested parties.
- To define and cascade through the organisation quantified objectives and targets that reflect this policy and against which Company performance will be reviewed on a regular basis.
